

Dear ProjectConnect User

The next time you login to your ProjectConnect Company Account you will find a number of new features that will provide your company with enhanced ways to find and win new business.

Basically, we are providing you with the same level of access to ProjectConnect data that we have been supplying to developers such as Woodside, Chevron, BHPBilliton and Citic Pacific, just to name a few.

What's New?

1. Search Supply Opportunities

This search engine allows you to quickly interrogate and register interest on any open project opportunity that is currently listed on ProjectConnect. You can search for specific opportunities such as pumps, motors, switchboards, etc. You can also search for recently listed or awarded opportunities.

2. Search Contract Winners

This database contains the details on thousands of companies, Australian and international, that have been awarded contracts by the projects utilising ProjectConnect.

3. Search ProjectConnect's supplier database

This search engine allows you to interrogate ProjectConnect's complete database of over 6000 suppliers that provide goods and services to projects.

4. Search Suppliers for their Past Contracts

Information provided by companies like your own include details on past contracts they have supplied to projects. This database is searchable and can provide you with an instant listing of successful suppliers to industry sectors, specific projects and products.

5. Build and Store your Own Unique Supplier Directories

ProjectConnect enables you to find and store company profiles in your own unique directory listings. We call these Tagsets. There are numerous tools available to you in the Tagset module that allow you to view, manipulate, copy, delete, rename and merge your Tagsets. You can also share your Tagsets with other people in your organisation.

We still have a few weeks left refining the new system. Over this time we will appreciate your feedback on its performance and usefulness to your business.

On 1 July 2009 we are planning to introduce a flat fee of \$150 plus GST to access the [Search Supply Opportunities](#) and [Search Suppliers for Their Past Contracts](#).

ProjectConnect
fast access to project opportunities

A separate fee will be charged to access [Search Suppliers for Their Past Contracts](#), [Search Suppliers for Their Past Contracts](#) and [Build and Store your Own Unique Supplier Directories](#). This fee will be determined by the number of employees a company has.

Employees	Fee (net of GST)
1-5	\$200
6-25	\$250
26-50	\$350
51-100	\$450
101-250	\$600
251-600	\$800
601-15001+	\$1,000

There will continue to be no charge for you to have a company profile listed on ProjectConnect or continue registering for any listed supply opportunity via the public website, as you do now. The new fees being introduced only apply to the additional search engines and features that are being provided via the “Your Company Account” module.

If you need help accessing your ProjectConnect Company account please [Click Here](#).

The aim of ProjectConnect is to increase the flow of information between buyers and suppliers. I hope these new ProjectConnect services will assist your company to expand its business and business relationships.

Best Regards
David Kobelke
Manager ProjectConnect
